

Product manager with experience across B2B software, ERP, IoT, and carbon management products. Owns the end-to-end lifecycle of shipment and return systems serving Taiwan, China, Korea, and South Asia and processing more than 10,000 orders monthly. Skilled at translating complex business requirements into user scenarios, prioritized backlogs, and verifiable specifications from discovery through international rollout and continuous iteration.

Experience

Nov 2025 - Present WT Microelectronics	Product Associate Manager Shipment & Return System Product Owner • Own the O2C shipment and return module across discovery, issue analysis, specification, delivery, testing, launch, and operations. • Design complex KIT shipment/return and virtual adjustment workflows integrated across SAP, EWM, and Portal. • Lead legacy-system retirement through phased backlogs; planned the Korea rollout, training, and access migration, increasing adoption by 8%. • Support integration with a Canadian subsidiary and automated shipment planning; introduced AI-assisted analysis, specifications, and prototypes.
Nov 2023 - Nov 2025 Chicony Power Technology	Product Manager Carbon Management SaaS Product Owner • Led zero-to-one development and redesign; launched the MVP within six months and secured the first five enterprise customers. • Redesigned workflows and data architecture across emissions calculations, activity data, emission factors, dashboards, and compliance reports. • Built feedback-driven iteration and CI/CD processes; led resolution of 300+ product issues across engineering, sales, and support. • Smart Building IoT: owned integrations and feature design across 15+ on-premise sites; led upgrade testing and interface redesign.
May 2022 - Nov 2023 Aotter Inc.	Project Management Specialist / Team Lead • Managed external software projects and internal product operations, including planning, competitive analysis, specifications, and delivery. • Estimated budgets, staffing, and schedules; assigned work, reviewed engineering progress, and reported to leadership. • Aligned clients, sales, design, and engineering while managing scope changes, costs, and priorities.
